

CAVIAR

*Caviar is a truly unique product on the market. Caviar is composed of agglomerated micro-capsules. The agglomerated product is classified in different sizes to match the different stage of the fish larval development. Each capsule is filled with small peptides and low MW soluble proteins, nucleotides, EFA based phospholipids, a balanced profile of chelated trace minerals, etc. Caviar is recently formulated with frozen krill mince (*Euphausia superba*) as its main ingredient. This Krill is fished in the pristine waters of the Antarctic sea. This key ingredient is giving to Caviar a better palatability, increased performance and extremely low levels of contaminants such as heavy metals and dioxins.*

INGREDIENTS

Frozen krill mince, high quality fish and other marine proteins, fish soluble, non GMO soya isolate, refined fish oils, phospholipids, yeast and yeast extracts, vitamins and minerals.

ANALYSIS

Nutrient	Value	Nutrient	Value
Moisture (%)	8,0	Vitamin A	15.000 IU/kg
Protein (%)	55,0	Vitamin D ₃	3.000 IU/kg
Lipids (%)	15,0	Vitamin C	1.000 ppm
Ash (%)	15,0	Vitamin E	1.000 ppm
Cellulose (%)	6,0		
Phosphorus (%)	1,5		
Total (n-3) HUFA	25,0 mg/g		
DHA	12 mg/g	Total Energy (kJ/g)	21,50
EPA	10 mg/g	Digestible Energy (kJ/g)	20,00

AVAILABLE SIZE

50-100 microns (1,0 kg alu PE bags)	300-500 microns (5,0 kg buckets)
100-200 microns (1,0 kg alu PE bags)	500-800 microns (5,0 kg buckets)
200-300 microns (5,0 kg buckets)	

INSTRUCTIONS FOR USE

Feeding rate at 18°C

As required: up to 15 g/m ³ /day	50-100 µm
As required: up to 50 g/m ³ /day	100-200 µm
50-100 g/m ³ /day	200-300 µm
100-250 g/m ³ /day	300-500 µm
5-10% biomass/day	500-800 µm

PACKAGING

Caviar is packed in aluminized PE bags of 1 kg, PE buckets or 5 kg or PE bags of 20 kg.
